(3) Preparation of SF 364  
(4) Report of Discrepancy (ROD), SF 364

Report Required: Report of Discrepancy (ROD), SF 364 (Report Control Symbol Exempt)

1. Purpose. To publish specific guidelines for the accountability and document preparation for reports of shipping discrepancies.
2. Cancellation. StaO 4440.1.
3. Background. The reference applies to the identification, reporting and resolution of discrepant shipments of material occurring in any element of the Navy Logistics System when the discrepancy is attributable to a shipper error.
4. Summary of Revision. This Order has been changed throughout and requires complete review.
5. Information. The Department of Defense (DoD) Report of Discrepancy (ROD) system, its policy, procedures and effectiveness have been the subject of management attention and review. The ROD program is the direct result of the increased emphasis on the quality of logistical support throughout the DoD. The ROD system, designed and intended to highlight breakdowns in the physical distribution system, is a quality control tool that is decidedly underutilized within the Navy.
6. Action. A ROD will be processed in compliance with the procedures set forth by this Order as follows:

7 NOV 1995

a. Naval Supply Systems Command Instruction. Reference (a) provides Marine Corps Air Station, Yuma with the policy and procedures for processing a customer's report of non-receipt of material or discrepancy in shipment which includes lost, short or damaged material, incorrect/erroneous items, and unacceptable overages. From time to time, it may be necessary for customers to report discrepancies. Reference (b) provides information on supply condition codes for use on the SF 364.

b. Customer responsibility. Customers will file the ROD with the shipper for material requisitioned through the Navy Logistics System. For material procured through open purchase, the ROD is filed directly with the Contract Administrative Office for that specific purchase order, blanket purchase agreement, or large contract. Reference (a) does not require Station Supply to prepare and/or monitor customer reports. All discrepant material reported on the SF 364 will remain with the customer until the discrepancy is resolved and disposition has been given.

c. Criteria. The criteria for filing a ROD is provided in enclosure (1). The time frame criteria for submitting the report is provided in enclosure (2). The preparation instructions for filling out the SF 364 are provided in enclosure (3). The reporting customer must complete blocks 1-15 of enclosure (4). The action activity will reply using blocks 16-24 of the reverse side of the submitted SF 364. This form can be purchased through ServMart.

d. Repairables. Repairable material that is not inspected at the time of receiving because of preservation reasons, when later found to be discrepant, must be reported with the following statement:

"ROD submitted late because of extenuating circumstances. Material is a repairable item. At time of receipt, the shipping document matched the container markings. Container was not opened because of packaging and preservation considerations. A technical inspection was not performed at time of receipt."

e. Shipper. RODs filed against Marine Corps Air Station, Yuma as the shipper should be mailed to:

Supply Department SF 364  
Code 3KC2C (OS&D)  
Box 99133  
MCAS Yuma, AZ 85369-9133

All ROD's received by MCAS Yuma Supply Department will be dated upon receipt and processed promptly within the time frames prescribed by reference (a). MCAS Yuma will determine the validity of the

customer's billing adjustment request based upon the status or condition of the material. The Supply Department, Supply Support Division, Receipt Control Branch is responsible for monitoring the frequency and nature of customer's reports of material non-receipt or discrepancies in shipments.
